LIFE Living Independently in Functional Environments

The LIFE Program offers a unique opportunity for individuals desiring more autonomy in activities of daily living. Increasing independence and fostering enjoyment from tasks is paramount in this program.

Based upon individualized assessments, participants engage in moti-

vating activities aimed at increasing individual skill repertoires.

Lead by Board Certified Behavior Analysts and Board Certified Associate Behavior Analysts, this program provides behavioral training in the following areas:

- Self-Care
- Vocation
- Domestic
- Production
- Leisure
- Recreation
- Food Preparation
- Activities of Daily Living

Individual skills targeted within training areas are presented in a manner designed to increase learner motivation and independence.

More Information...

Interested parties contact ABLE Academy at 239-352-7600 to inquire further. Academy staff will conduct interviews with family members, caregivers and the targeted participant. A brief assessment will be completed to determine the needs of the potential participant. Groups are formed with needs in mind to ensure quality programming consistent with the ethical guidelines of Applied Behavior Analysis. Individual and group goals are carefully selected. Groups meet two times per week and commence for eight weeks. Individual participant data is maintained during each session. Information regarding progress is shared with family members and caregivers at the end of each session. Data is reviewed and reported every four weeks.

Sessions are held on Monday and Wednesday
from 4:00—6:00 p.m. on-site at
ABLE Academy

Family/Caregiver Training

Research clearly indicates that in order for a person to apply and generalize newly acquired skills across all environments, opportunities to practice and generalize targeted skills must be afforded in all environments. To ensure effective programming, family and caregiver training is included with the LIFE program. Families are asked to meet with ABLE Academy staff once per eight-week session to review participant progress and receive training and support for implementing necessary procedures in natural environments.

ABLE ACADEMY MISSION

ABLE Academy is committed to the study of human behavior and development and its effective application to persons with identified needs. Progress is not a hope, but a guarantee resulting from the use of scientifically validated procedures for adding, decreasing or extinguishing behaviors.

We at ABLE Academy believe that every person, regardless of their current level of functioning, is entitled to the highest quality treatment. In line with single-subject design research, each learner's program development and implementation is based on data specific to the learner. We hold our standards of treatment to those developed by the National Board of Behavior Analysis.
