RESEARCH-BASED SKILL DEVELOPMENT

Ah, the summer months in Florida! Bright sun, hot sand, and an opportunity like no other to shine! Camp Able Academy offers intensive and comprehensive programming designed and implemented by Board Certified Behavior Analysts, Board Certified Associate Behavior Analysts and highly skilled Applied Behavior Clinicians. Camp Able affords children a one-of-a-kind learning environment in which all instructional methodologies are research based and scientifically validated. Able Academy's innovative three-tier approach to skill acquisition results in generalized learning that occurs in a motivating environment through various learning activities.

Your child's day at Able Academy includes the following:

TIER ONE – In tier one, staff provide individualized Applied Behavior Analysis with an emphasis on expressive language.

TIER TWO – In tier two, staff provides intensive, small group instruction targeting each learner's individualized skills.

TIER THREE – Tier three activities are carefully designed to encourage learners to demonstrate their skills with no adult prompting.

All tiers of instruction are incorporated into learning zones, which include:

BRAINWORKS – A “classroom style” instruction zone incorporating vocabulary development, literacy skills and numeracy skills.

MUSIC IN MOTION – Gross motor work is combined with exhilarating music that encourages learners to sing, dance, and move through their targeted skills.

DISCOVERY ZONE – Fine motor activities and early science concepts are incorporated into this messy exploration time.

TARGET ZONE – Target zone is designed to provide extra practice in skill areas requiring a bit more attention. Learners team up with peers who have similar learning profiles during this carefully designed zone.

SOCIALIZATION – Pro-social and play skills are targeted through every activity and interaction during the day.

What Makes Able Academy Unique?

- Four Board Certified Behavior Analysts and Board Certified Associate Behavior Analysts on-site.
- Innovative, research-based approach to acquisition and generalization pioneered by Able's Clinical Director.
- Daily progress reports provided; assisting in school to home carryover
- Errorless teaching is utilized in all activities, ensuring high rates of correct responding
- Ongoing family training
- Small group ratios ranging from 1:2 to 1:6.
